BHATHIYA MANETH RANAWEERA

Multidisciplinary filmmaker crafting visually immersive worlds through direction, cinematography, visual effects, animation, and lighting. From concept to final frame, each piece is shaped with complete creative control driven by atmosphere, emotion, and shadow. Stories unfold through carefully constructed visuals where silence speaks, light fades, and beauty slips quietly into the uncanny.

ABOUT ME

CONTENTS

I'm Bhathiya Maneth, a Filmmaker, 3D Animator, and Visual Effects Artist dedicated to emotionally resonant storytelling. My work blends grounded realism with cinematic direction and a touch of visual enchantment, creating narratives that linger in both heart and mind.

I handle every part of the creative process myself, from writing and directing to cinematography, animation, editing, and compositing, using industry-standard tools like Maya, Blender, Nuke, Unreal Engine, After Effects, Premiere Pro, and DaVinci Resolve. Each project is built from the ground up with care, precision, and a deep commitment to craft.

Defined by strong composition, atmospheric lighting, and a sense of the unexpected, my visual style transforms quiet moments into lasting impressions. Whether grounded in realism or touched by the surreal, I aim to create work that feels emotionally true, even when born from imagination.

Thank you for taking the time to explore my work. I'm open to collaborations, freelance opportunities, and creative partnerships centered on meaningful, visually rich storytelling.

DEADPOOL

SCENE RECREATION

[WATCH HERE](#)

An action-packed animation created in Blender, featuring Deadpool brought to life through custom animation based on my own reference footage. While the character model was sourced, all animation, camera work, lighting, and compositing were done entirely by me.
Skills used: Character Animation, Camera and Scene Animation, Modelling, Texturing, Scene Lighting, Compositing, Rendering, Editing and Color Grading.

IMPRESSIONS

CREATIVE PROCESS

1. Rigging

"I STARTED BY RIGGING THE CHARACTER WITH DETAILED CONTROLS TO ENABLE PRECISE MOVEMENTS. I ALSO ADDED A CLEVER MOUTH CONTROLLER, SINCE THE MOUTH HAD TO MOVE DIFFERENTLY DUE TO THE MASK ON THE FACE."

2. Reference

"I RECORDED MYSELF ACTING AS DEADPOOL TO USE A REFERENCE FOR MAKING THE MOVEMENTS MORE REALISTIC."

"I WANTED A CITY ENVIRONMENT THAT FIT THE DEADPOOL VIBE, SO I PUT ONE TOGETHER IN BLENDER USING SOME ASSETS AND MY OWN TOUCHES."

3. Environment Design

4. Animation

"I BROUGHT THE DEADPOOL ANIMATION TO LIFE, PROGRESSING FROM BLOCKING TO THE FINAL CUT, USING MY OWN ACTING AS REFERENCE TO ENSURE REALISTIC MOVEMENTS."

5. Editing + Colour Grading

Final Touch-ups in After Effects

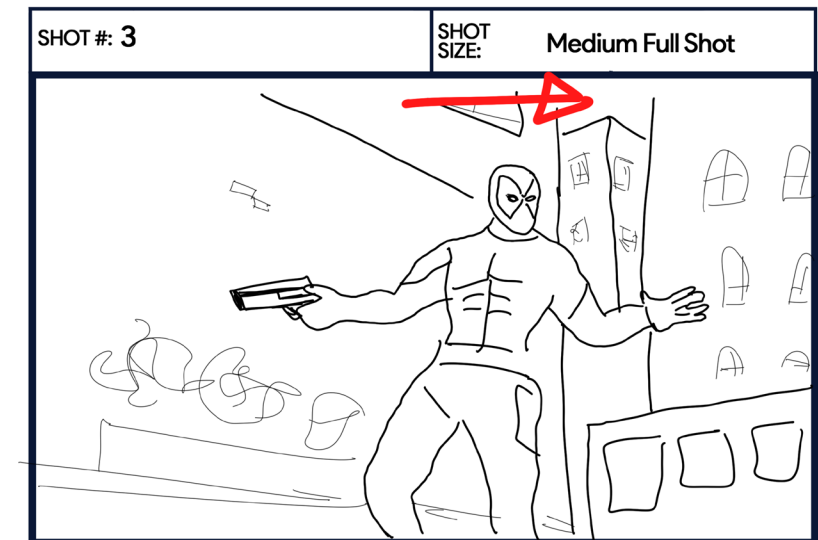

PREPRODUCTION - STORYBOARDS

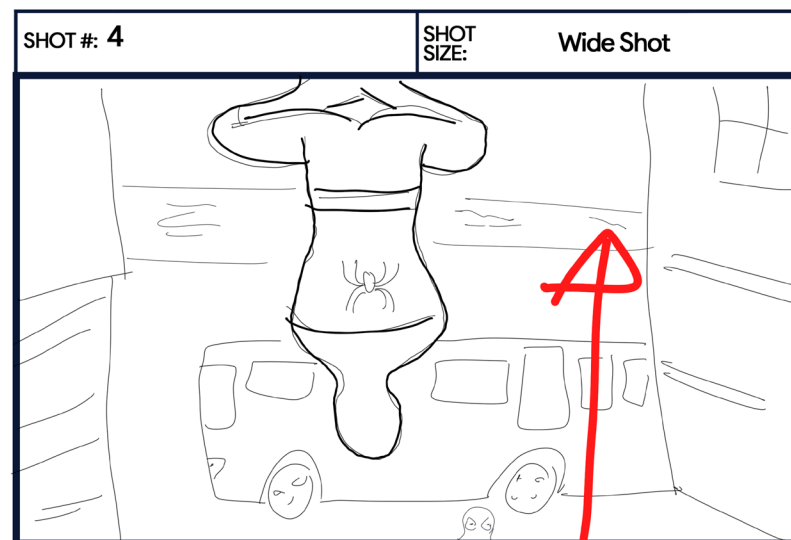

Deadpool stands up after the bus crash.

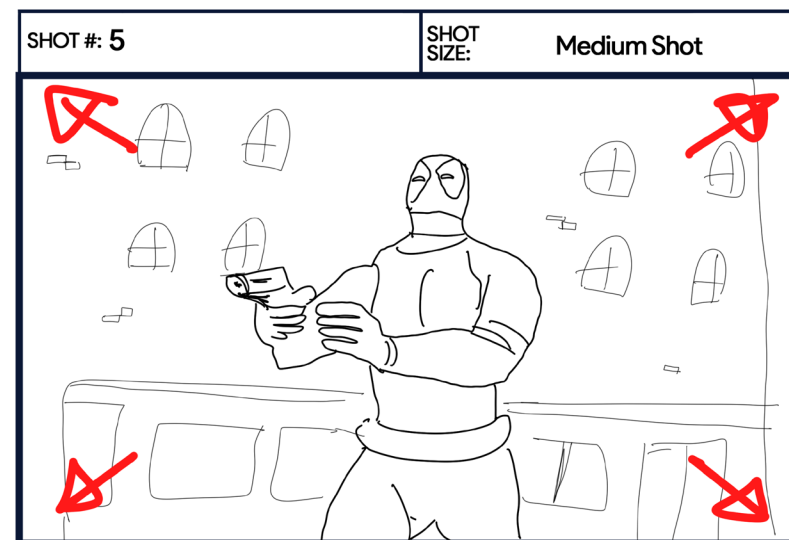

Deadpool points the gun towards the spider.

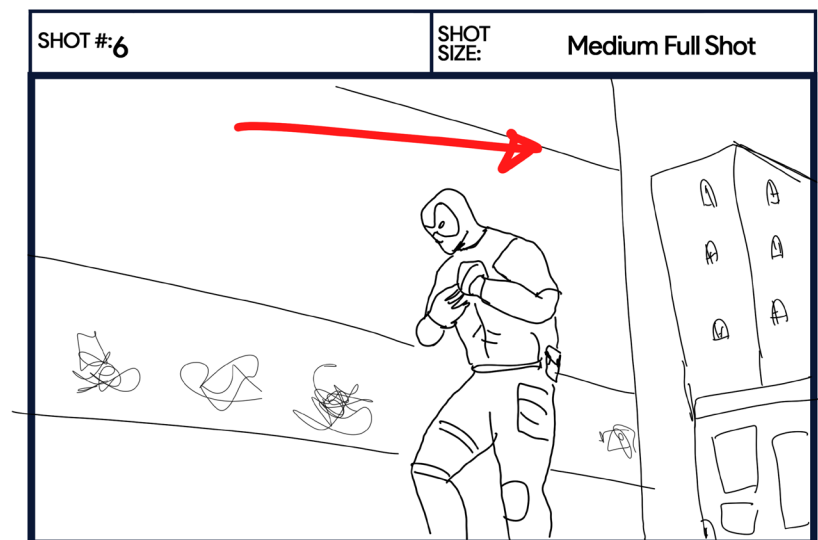

Deadpool replies the far voice by blaming him.

Deadpool sees the spiderman

Deadpool confusing by seeing spiderman

Deadpool takes the gun back and introduces him to them. Then suddenly another bus falls to him.

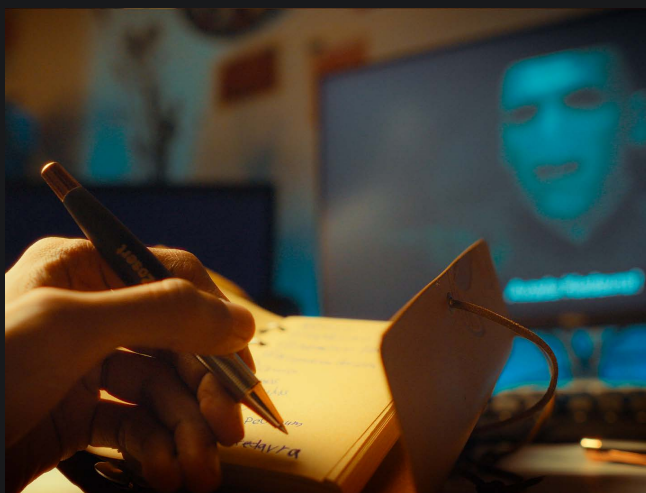

The Story Behind my Magic

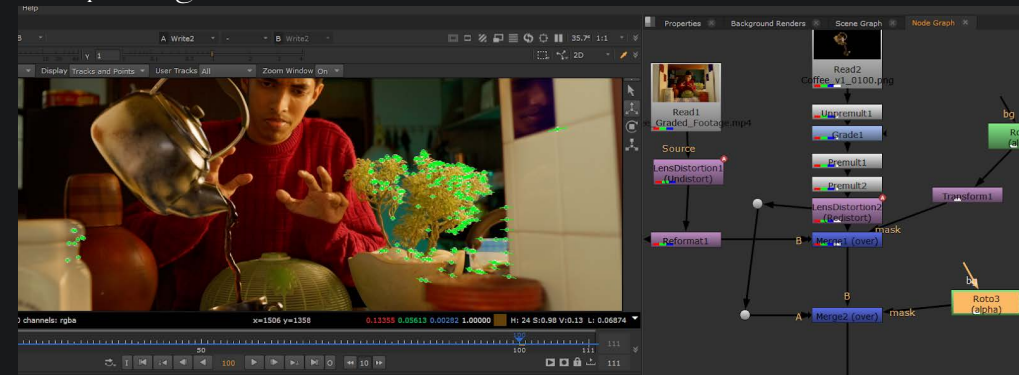

[WATCH HERE](#)

A personal 2-minute short film entirely crafted by me, showcasing the origin story of a magician. From the moment he first stumbles upon magic to how it shapes his path and the way he uses it today, this film is a reflection of imagination, transformation, and wonder. Skills used: Writing, Directing, Acting, Cinematography, 3D Animation, VFX, Editing, Sound Design, and Color Grading.

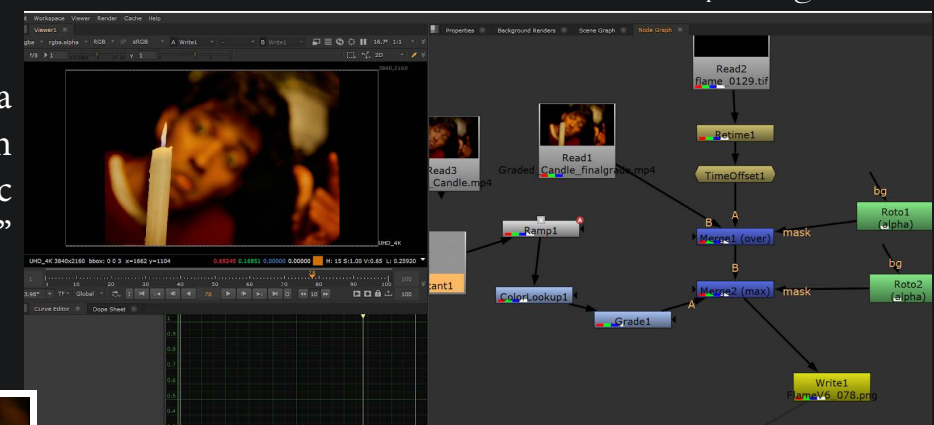

IMPRESSIONS

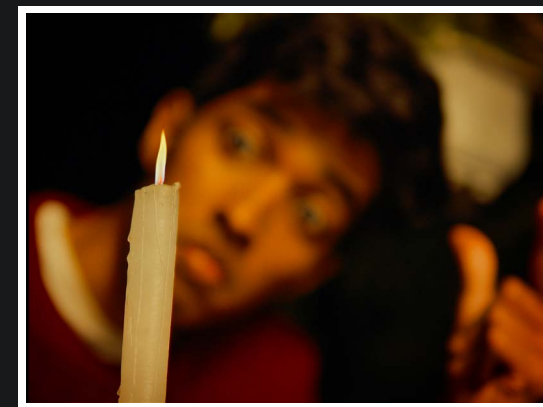

Compositing in NUKE

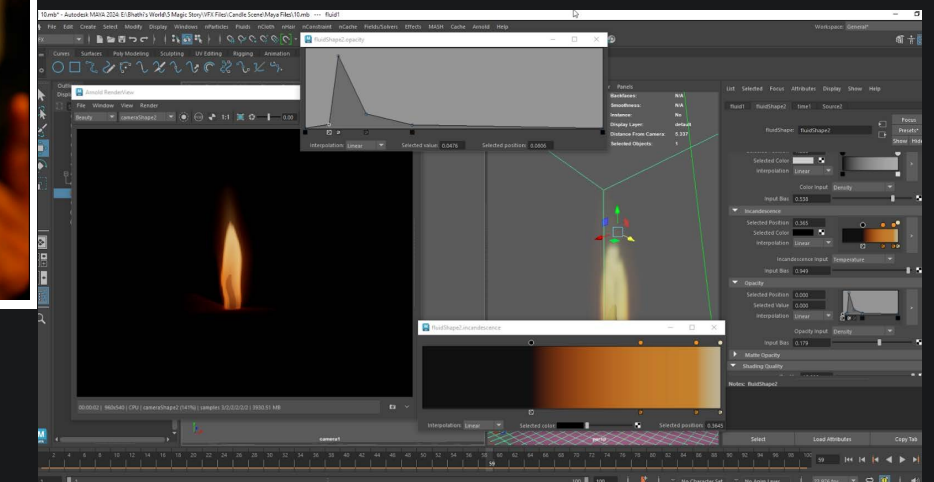

“The candle flame was created in Maya using fluid simulations, then composited in Nuke for realistic lighting and blend to the atmosphere.”

CGI in Blender

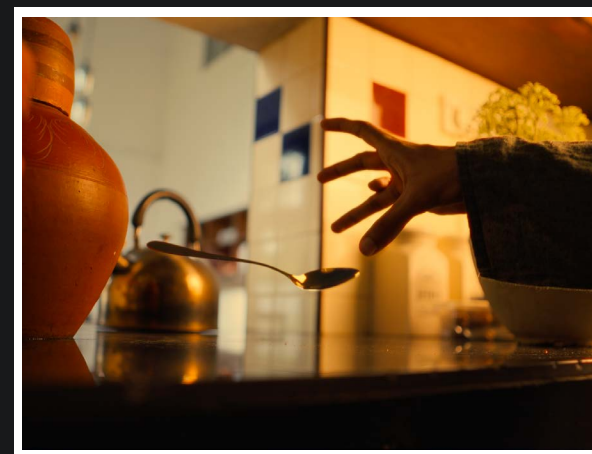

CGI in MAYA

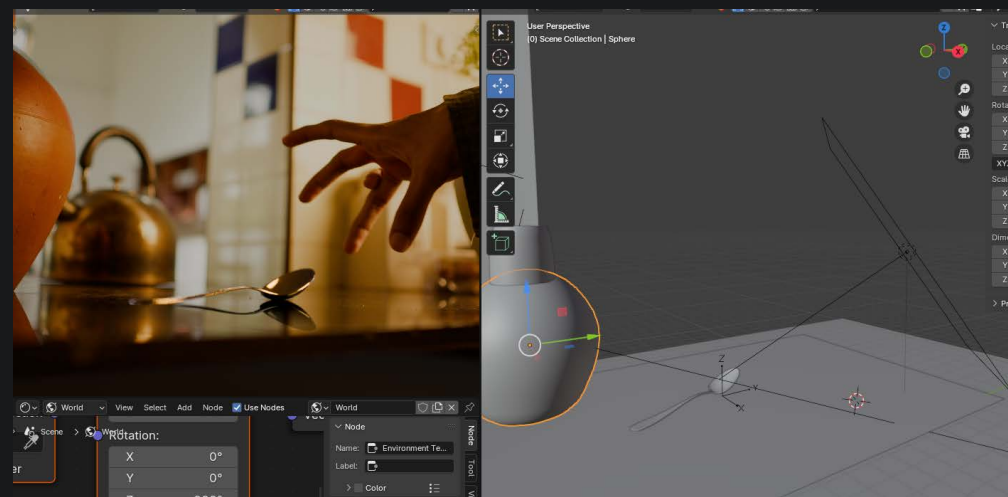

“In this Kettle Floating shot, the kettle and cup are animated to float naturally using carefully crafted keyframes and physics simulations in Blender and composited in Nuke. Realistic lighting and subtle shadows enhance the sense of weightlessness, while motion blur adds smoothness to the movement, grounding the magical effect in believable visuals.”

3D ANIMATION + VFX SCENES

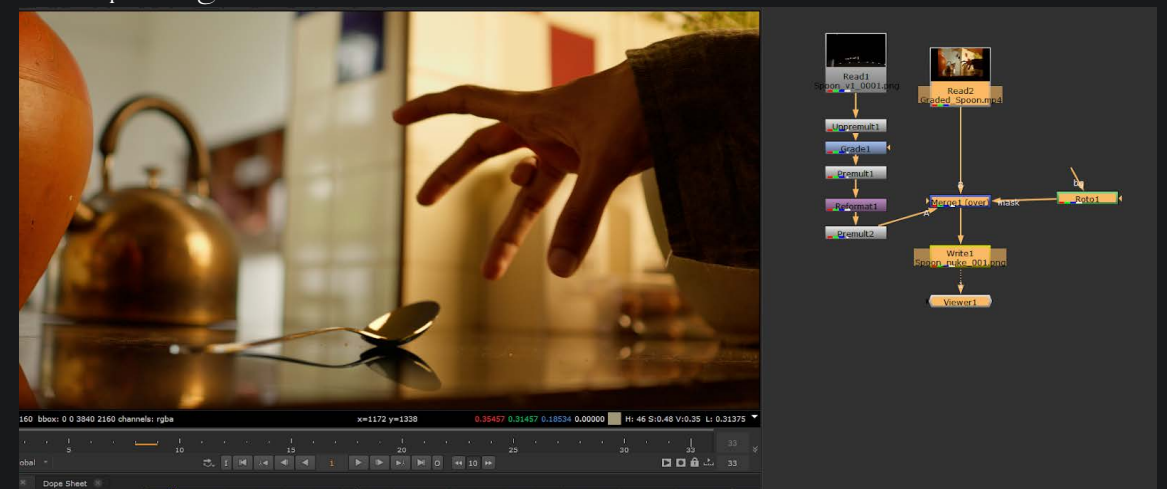

CGI in Blender

“The spoon float shot was created using precise keyframe animation in Blender, with soft shadows to convey smooth, natural movement, and composited in Nuke for enhanced visual integration.”

Compositing in NUKE

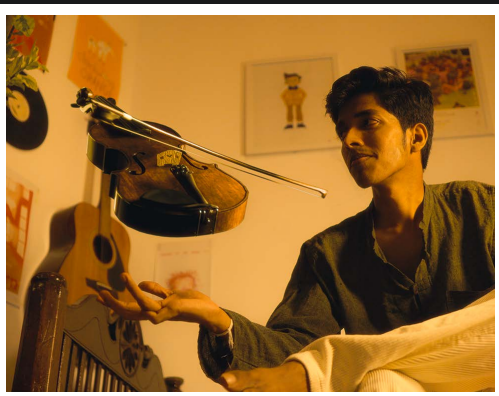

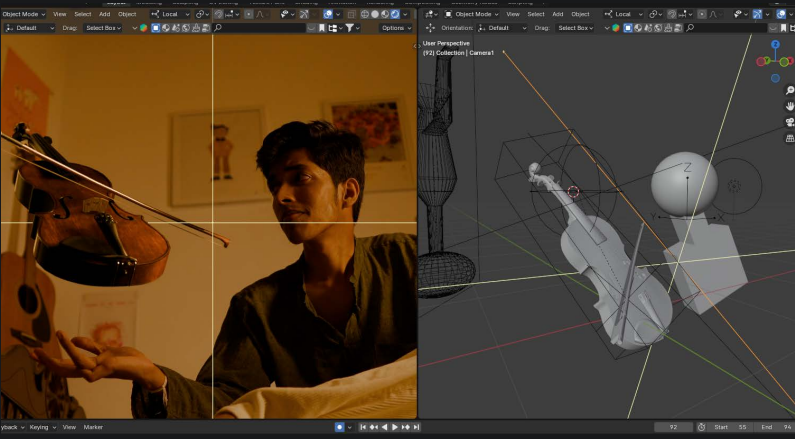

Compositing in NUKE

“The violin float scene features detailed keyframe animation in Blender, with realistic lighting and soft shadows to emphasize its graceful, suspended motion. The footage was composited in Nuke to seamlessly blend the violin into the environment.”

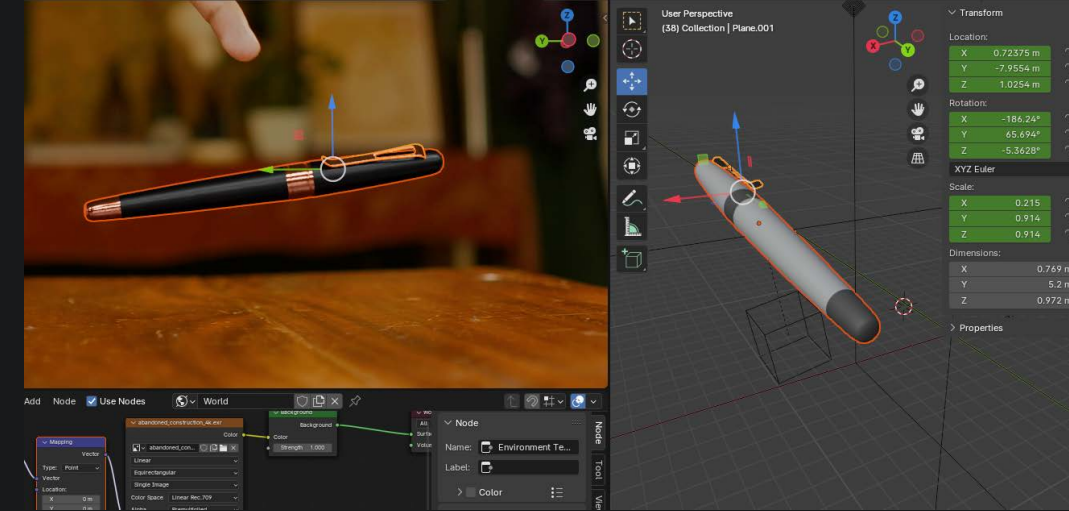

CGI in Blender

3D ANIMATION + VFX SCENES

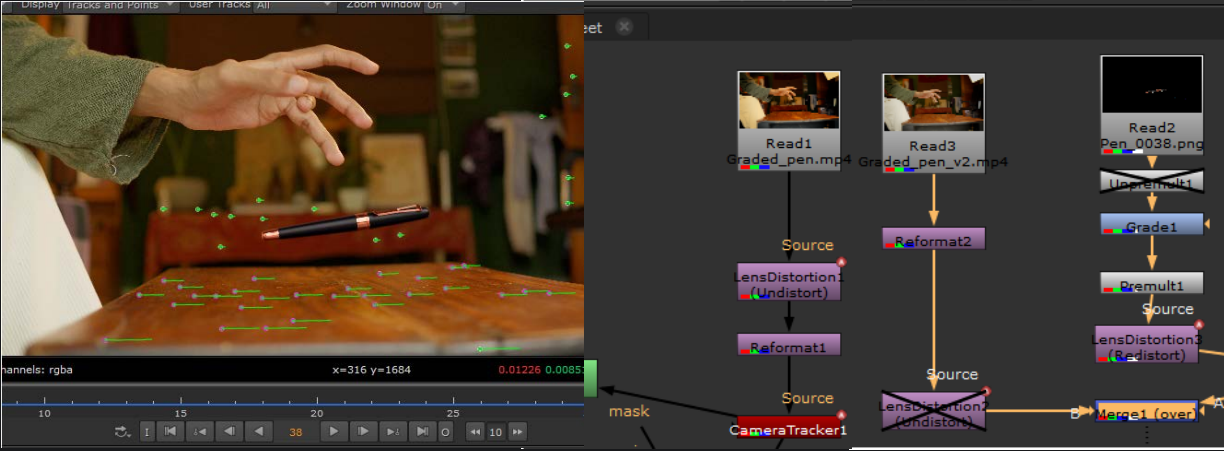

CGI in Blender

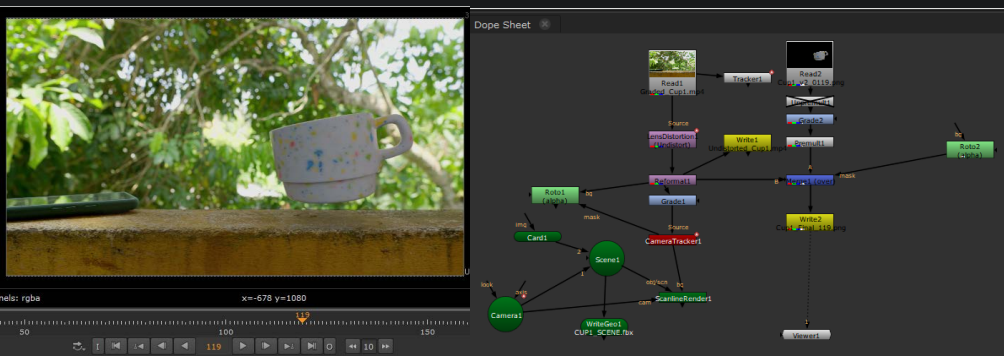

“The pen float scene was animated with precise keyframes in Blender. I used my own pen as a reference and recreated it in 3D with highly realistic textures. Subtle lighting and soft shadows highlight its delicate, weightless movement. The shot was composited in Nuke for a seamless magical effect.”

Childhood Dream into reality.

[WATCH HERE](#)

A deeply personal short film crafted entirely by me. bringing a childhood vision to life through a blend of live-action, animation, and visual storytelling. This project transforms a simple dream of making his own figure from sketch into a tangible cinematic experience, combining heartfelt narration with surreal visual effects.

Skills used: Writing, Directing, Acting, Cinematography, 3D Animation, VFX, Editing, Sound Design, and Color Grading.

EDELKRONE COLLABARATION

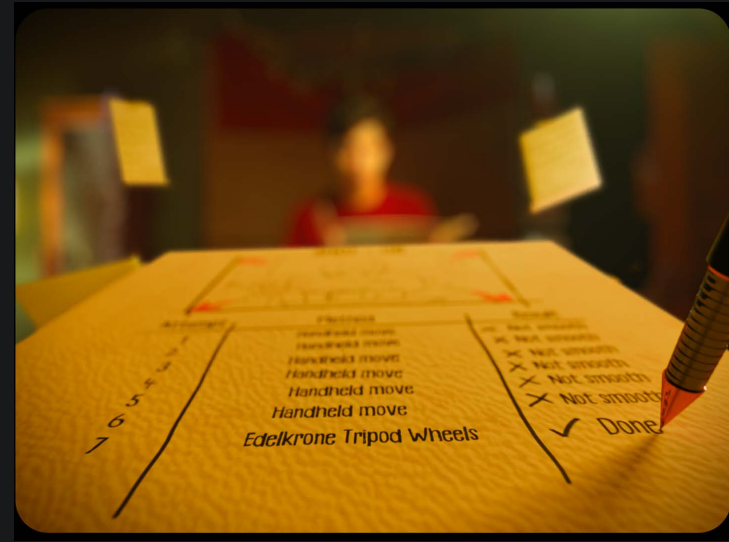

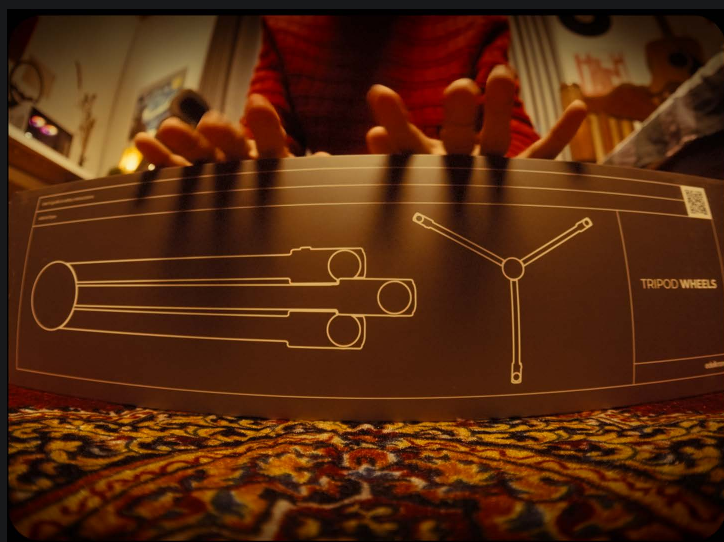

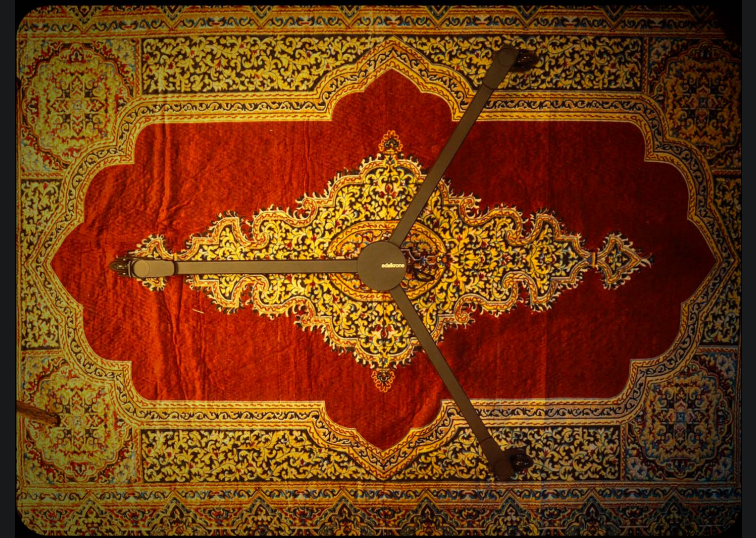

Produced in partnership with Edelkrone, to creatively showcase their Tripod Wheels in action. The result is a one-minute product reel entirely directed, shot, edited, and enhanced with VFX by me, blending smooth camera movement with thoughtful composition and lighting to highlight both the product's functionality and design.

Skills used: Writing, Directing, Acting, Cinematography, 3D Animation, VFX, Editing, Sound Design, & Color Grading.

IMPRESSIONS

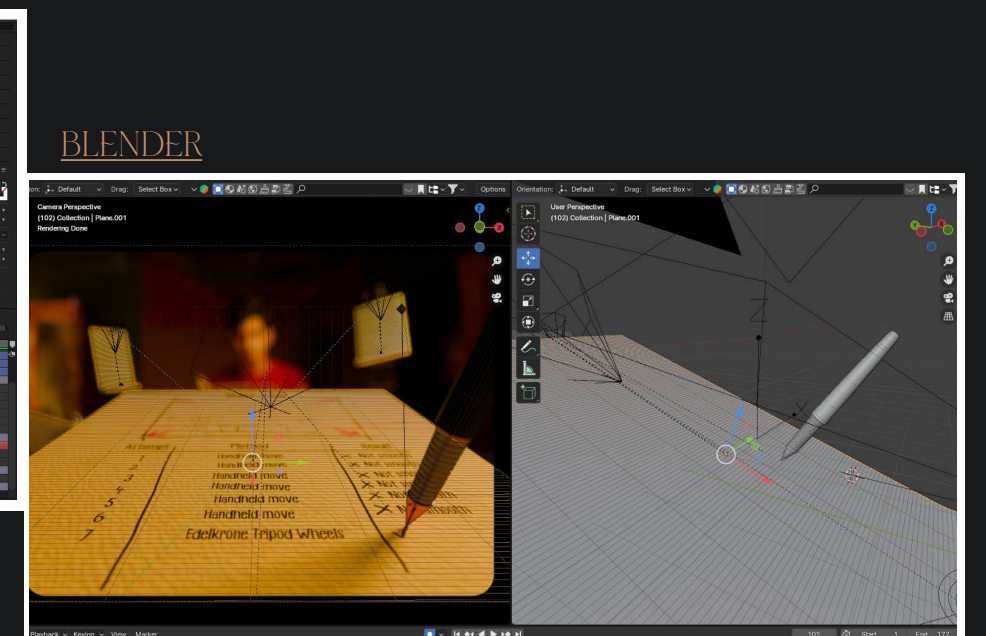

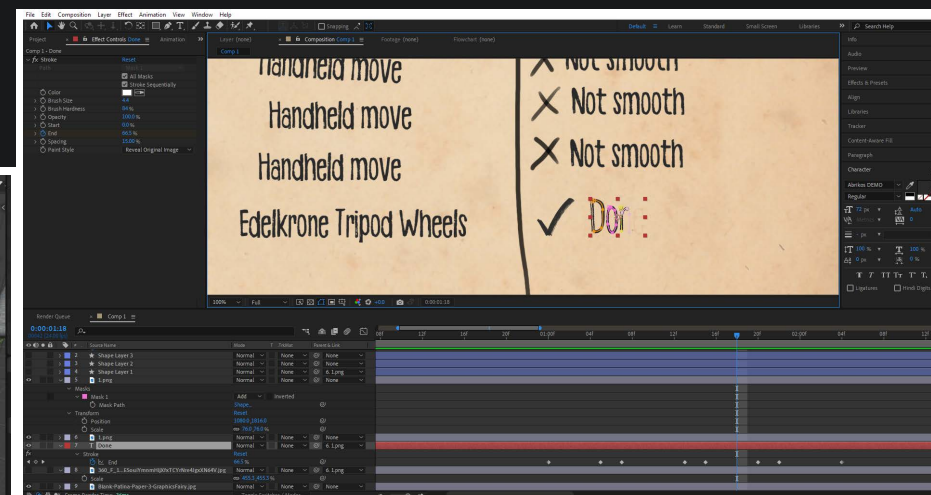

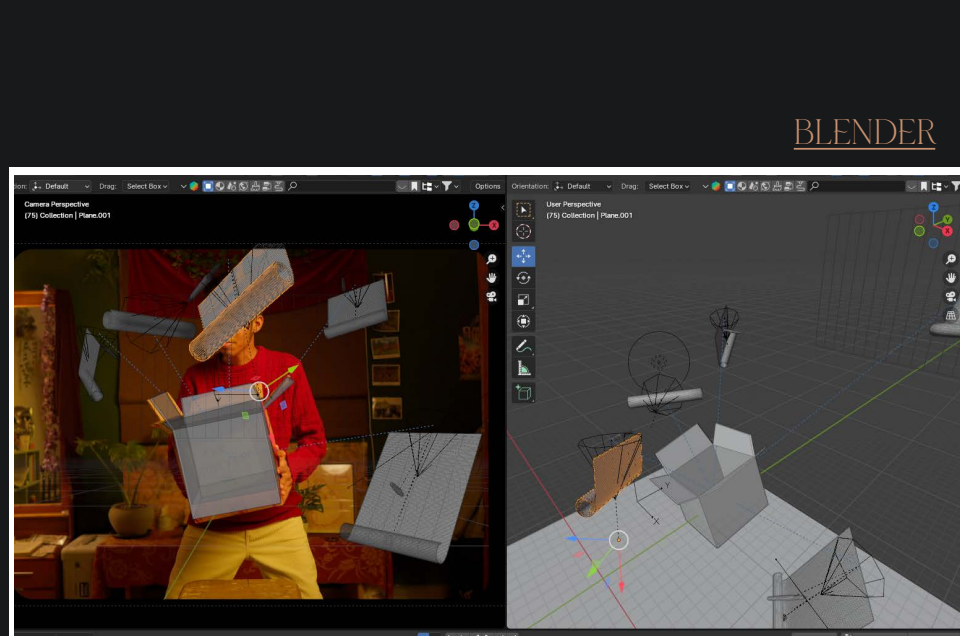

3D ANIMATION + VFX SCENES

“This reel was made for Instagram, so I focused heavily on the hook within the first three seconds. I planned to add some VFX to make it stand out and feel unique to the viewer. I also ended it as a seamless loop, encouraging viewers to watch it a second time. In the VFX element, I included the brand name edelkrone to leave a strong impression and present it as a magical and powerful brand.”

AFTER EFFECTS

“I used After Effects to create the writing stroke animation on paper, and Blender for the Scene animation and rendering. The color grading was done in DaVinci Resolve. I also used the actual product to shoot all the dolly motion shots in the video, to show the real product in action and build trust with the viewer.”

“Thank you for stepping into my world.”
